Professional Summary

I have a strong interest in software development and data analysis, with hands-on experience in full-stack web development and a love for teamwork. I'm eager to create technology that brings real value to both public and private sectors. Known for being curious, adaptable, and collaborative, I'm always excited to learn and contribute to impactful tech projects.

Project Experience

Let's Help 2Gether – Web Developer | April 2025 - Present

Live Demo: lets-help-2gether.com

- Integrated basic authentication flow and session management with Laravel Breeze
- Designed database schema to support CRUD operations and user submissions for competition use
- Refactored frontend components using Tailwind CSS to enhance user experience and reduce load time
- Collaborated with a 3-member agile team using GitHub Projects and weekly scrum standups
- Submitted project as part of the P2MW 2025 National Student Entrepreneurship Program
- Conducted unit tests and manual testing to validate user flow and functionality before final deployment
- Optimized SQL queries for the dashboard data to reduce response time under limited hosting resources

PT. Maspion – System Analyst | December 2024 - February 2025

Live Demo: cms-maspion.dbi-project.my.id

- Conducted needs assessments and scoping meetings with the IT department and client-side marketing team
- Drafted DFDs and system workflow visuals using Miro to support internal system handovers
- Created and prioritized development tasks and bugs in Notion with clear categorization and deadlines
- Participated in sprint planning sessions to define timelines and deliverables for two frontend modules
- Collaborated with UI designers to ensure the wireframes aligned with system logic and backend constraints
- Developed structured documentation for future handover including ERD references and API endpoint outlines

PT. Digital Business Innovation – System Analyst | September 2024 - February 2025

Live Demo: cms.dbi-project.my.id

- Collaborated directly with clients to elicit and refine business and functional requirements
 - Created structured Data Flow Diagrams (DFDs) to map out system logic and processes using Miro
 - Developed Use Case Diagrams and feature requirement lists to translate business needs into system specifications
 - Facilitated remote meetings between design and dev teams to ensure alignment with client expectations
 - Managed project scope and feature backlog using Notion for sprint planning and progress tracking
 - Authored and maintained centralized project documentation using Google Docs for real-time team collaboration
 - Contributed to solution design decisions by evaluating feasibility and technical constraints with the dev team
-

Certifications

- Full Stack Web Development – Udemy | July 2023
 - Project Management Skills – STIKI | October 2023
 - Automation Frontend Workflow using GulpJs – STIKI | November 2023
 - AI Jumpstart Programme – British Embassy Jakarta | September 2024
 - Managing Diversity in Project – STIKI | October 2024
 - Project Management Challenge Finalist Top 10 - PMI Indonesia | June 2025
-

Technical Skills

- Web & Programming: PHP, Laravel, HTML, CSS, JavaScript, Node.js, Flutter
 - Database: MySQL, PostgreSQL
 - Tools: Git, VS Code, Figma, Miro, Notion, Trello, Power BI, Google Docs, Google Sheets
-

Education

Bhinneka Nusantara University – Bachelor in Information System

August 2023 – Present | GPA: 3.75

Languages

- Indonesian – Native
- English – TOEFL ITP 457 (PPTIK UBHINUS, May 2024)
